

MINIMes<sup>4.0</sup> is the ORCHESTRA MES solution specifically designed for those SMB's with no production process digitalization in place.

Fully integrated with SMARTHinge<sup>4.0</sup> ORCHESTRA's component, MINIMes<sup>4.0</sup> connects the shop floor operators on any device to track all the production phases allowing them to register activities, downtimes, production progress and anomalies.

The collected information integrated on the SMARTHinge<sup>4.0</sup> with data coming from the machines will provide real time production progress and status to the ERP and Business Analytics in use, in order to accomplish industrial accounting and multilevel OEE.
