friendly corner rounding design

1/4" Hex port

31mm

69mm

weight : 22g (Only drive. Torque adapter is not included.)

Torque Adapter

0.6/0.9/1.2/1.4/2.0/2.5/3.0/3.5/4.0/4.5/5.0/5.5/6.0 Nm

With the greatest advantage of "No Overtighten". It prevents the damages of the screw and tool, and ensures proper assembly. When the preset torque is reached, there is a "click" sound, stop tightening once this occurs. For continued tightening on the screw, it is no longer to increase torque on the screw.

- "Click" sound when preset torque is reached.
- Use SAME torque screwdriver to fasten and loosen the screws.
- Torque Accuracy: $\pm 10\%$.
- 30% reversible higher torque for loosening.
- Complied with various 1/4" Hex bits and handles.
