

Scope of Application

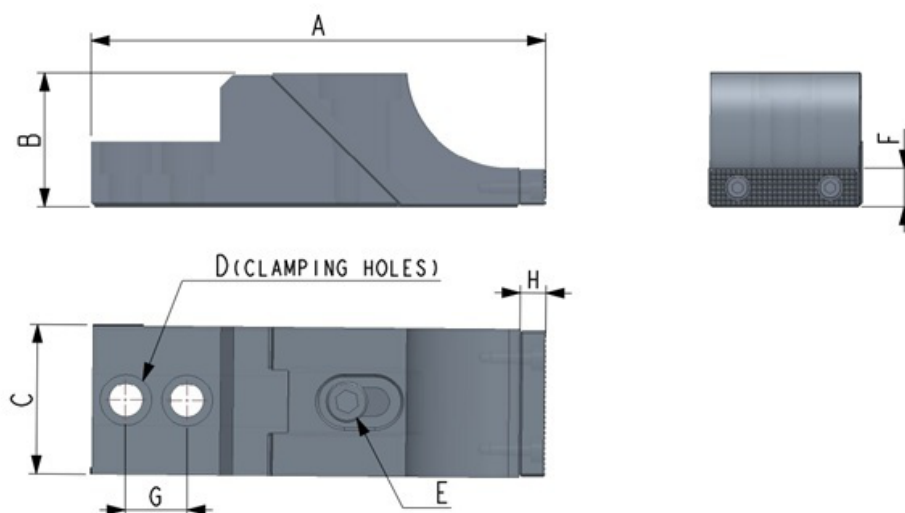

- A low-profile lateral clamp is used in jigs, fixtures, to hold work pieces securely without obstructing the top surface.
- Ideal for precision machining, CNC setups, milling tables, or modular fixturing systems

LOW PROFILE
LATERAL CLAMP

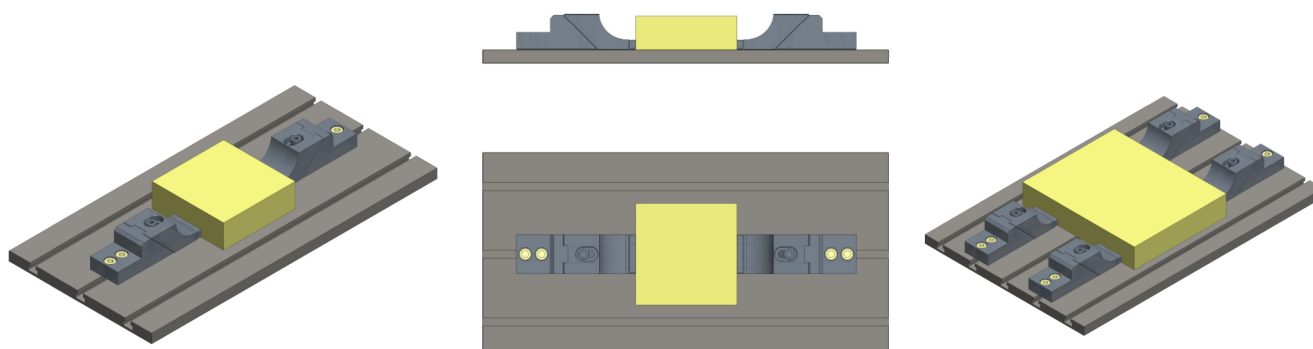

Product Feature

- Alloy steel clamps and toughened body.
- Jaw plates case-hardened.
- Easily used and clamping element.
- Fast adjustment.
- The jaws are reversible, smooth side for machined parts, serrated side for rough surfaces. We recommend using two bolts to mount the clamp to the machine table.
