

Special Accessories for Tools' Machining

Versatile Tool Holder

It is a 3-axis rotation holder, can transform at any angle, grind big relief and double relief angle.

Wheel Dresser

It can be easily assembled and disassembled on cutter holder, to ensure that the grind wheel surface is flat and sharp, effectively improving the quality of tool grinding.

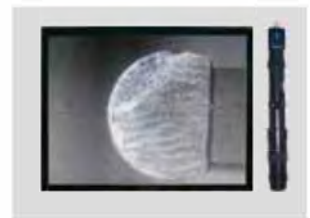

Filtered Water Tank

The first filter is a precipitating filter, the second is a cartridge filter. It can pass particles less than 5 microns, which can improve the edge quality with precision grinding.

On-line Monitoring System

Industrial camera combined with optical amplifier system, brings the real-time monitoring process and implement a simple online measurement.

High Precision Rotary Holder

HSK63 port, end jump, path jump $\leq 0.003\mu\text{m}$, DD motor drive, equipped with high resolution angle encoder, repositioning accuracy ≤ 3 angle second (arc-sec), any degree, rotate speed 0-600 RPM. Equipped with electronic handwheel, available for manual operation.

Manually Operated Chamfering Holder

Originally designed by a German engineer, this chamfering holder is simple and useful, making the chamfering process easily.
