

Multispindle drilling machine

Rottler PBM & Georg ultradrill

Specifications: *)

Drilling of tube support plates for steam generators, heat exchangers, condensers, reactors in the energy, chemical and petrochemical industries

- Rigid and stable design in heavy machine cast iron
- Up to 12 carriages
- Wide, individually adjustable speed range of the drilling supports
- Automatic tool changer
- Solid carbide & HSS tools can be used regarding to spindle power
- Gantry Design

Multispindle drilling machine

Rottler PBM & Georg ultradrill

Two manufacturers – combined expertise in one innovative solution.

Rottler Portal milling machine PBM 5000/8

Heinrich Georg Multispindle drilling machine ultradrill

Technical Data*

Main drive power each spindle max. [kW]	28
Speed range [r/min]	20 – 4.500
Torque max. [Nm]	254
Drilling diameter [mm]	8 - 60
Z-axis adjustment range max. [mm]	700
Width of machine table max. [mm]	8.000

* alternative variations on request!

Automatical clamping for workpieces
