

Press Release

Solutions for textile finishing, nonwovens and more... Mahlo at the Innovative Textile and Apparel Show

For the second time the Innovative Textile and Apparel Show opens its virtual fairground this year. For the second time, Mahlo takes the chance to get in contact with customers from all over the world. The experts from Germany will present the latest systems and solutions for efficient and high-quality textile production and finishing. The Bavarian machine builder's presentation will focus on process optimisation in a digital environment. Visitors have free admission and can register at <https://innovate.wtin.com/registration/>.

"Solutions for Textile Finishing, Nonwovens and more": this is the all-embracing motto at the Mahlo stand, which will take visitors into the world of measuring and control technology of the highest quality standards. In the textile industry, Mahlo is synonymous with high-quality automatic weft straighteners. The experts' recipe for success is decades of experience paired with the latest technological developments. Whether roller or needle straighteners, whether for the finest textiles or heavy fabrics – interested parties can find out about the right equipment for their specific requirements.

Process control systems such as the Patcontrol PCS for pattern recognition and the Famacont PMC for controlling weft and stitch course density also contribute to high-quality textile production and finishing. Mahlo wants to support manufacturers in optimising their production processes and thus also the end product in a cost-efficient way.

Solutions for technical textiles and nonwovens

Support in the production process is also available for technical textiles and nonwovens. The focus here is on the Qualiscan QMS quality measurement system. The modularly designed system, which consists of sensors and measuring frames, measures, logs and controls critical parameters such as basis weight, moisture or layer thickness across the entire fabric width. Depending on the application and task, different measuring methods are used for this purpose.

Thanks to this broad portfolio, Mahlo offers customised solutions for almost all requirements.

Mahlo GmbH + Co. KG

Mahlo GmbH + Co. KG belongs to the worldwide leading manufacturers of measuring, control and automation systems for the textile and finishing industry as well as the coating, film and paper sector. Mahlo is located in Saal on the Danube in lower Bavaria but operates worldwide: Five branch offices in Italy, Belgium, Spain, China and the U.S. serve as support stations for the key markets. Numerous international agencies and service stations offer customer support throughout the whole world.
