

**WALDRICH COBURG**

## Welcome to the universe!

We are known for our large machine tools, which are able to process a workpiece the size of a family house. Our machines are manufactured exclusively at our headquarter in Coburg – Made in Germany.

The TAURUS was one of the milestones in our more than 100-year company history. Since the introduction of the first TAURUS, we have introduced different variants. From the development of the TAURUS 25 to TAURUS 30 to TAURUS 30 Gemini, we have been able to offer our customers 4 versions so far.

We take the TAURUS to the next level and thus support our customers in meeting their future requirements.

With a large variety of portal sizes, traverse paths, table variants and RAM's we offer our customers a tailor-made and unique combination of flexibility, modularity and maximum precision. In line with this we have expanded our machining units with an extensive range of motor spindles and significantly increased the dynamics of our machine.

With our almost infinite number of possibilities, we break the boundaries of the known and thus create our own TAURUS universe – WELCOME TO THE UNIVERSE.

Visit us at our booth and experience the TAURUS universe up close.  
Or contact us.

We are looking forward to your visit.
